Strategic Support Area Central in CECOM Update to AMC

ABERDEEN PROVING GROUND, Md. – In his quarterly update with the U.S. Army Communications–Electronics Command on Wednesday, Nov. 6, Gen. Gus Perna lauded the command's accomplishments throughout his three-year tenure as commanding general of U.S. Army Materiel Command, CECOM's higher headquarters. "We're moving the ball without a lot of hoopla," he said. "We're solving problems, not fixing symptoms." Still, he emphasized that given the Army's continued focus on readiness, reform, and modernization, it was no time to let off the gas.

Army Depot Partners with Marine Corps to Upgrade Mobile Radar System

TOBYHANNA ARMY DEPOT, Pa. – A few years ago, the Marine Corps turned to the Army's Team Tobyhanna when its highly mobile multi-mission radar system needed modifying. Dozens of Tobyhanna Army Depot employees are changing the way two of the AN/TPS–80 Ground/Air Task Oriented Radar's (G/ATOR) three subsystems — Communications Equipment Group (CEG) and Power Equipment Group (PEG) — look and function.

'Attaboy' for Joint Tactical Terminal Software Test Automation

ABERDEEN PROVING GROUND, Md. – In combat on land, at sea, in the air, and even in cyberspace, joint force warfighters rely on real-time data on threats and friendly forces to make split-second, potentially life-and-death decisions. Contrast that with the software development environment, where testing new programs and patches are crucial but often manual, laborious, and time-consuming.

CECOM Soldiers Inducted into SAMC

ABERDEEN PROVING GROUND, Md. – Six Aberdeen Proving Ground Soldiers were inducted into the Aberdeen/Edgewood Area chapter of the Sergeant Audie Murphy Club during a ceremony at the Myer Auditorium, Nov. 18. The inductees included Sgt. 1st Class Kamara T. Generlette–Shaw, Sgt. 1st Class Justin J. Bates, Sgt. 1st Class Gene H. Lucas, Jr., Sgt. 1st Class Phillip K. Durham, Staff Sgt. LaRita M. Fullwood, and Sgt. Jakerea L. Stowers.

'Illuminating' APG's Pooles Island Light

ABERDEEN PROVING GROUND, Md. – One could do a random poll of the APG workforce asking the question “Do you know what Pooles Island is?” and it is highly likely that the majority of responders would not know of the 280-acre, narrow island owned as part of APG off the southern end of the Edgewood peninsula. And now, the restored Pooles Island lighthouse will appear in a Maryland Public Television documentary on “Lighthouses of the Chesapeake Bay” slated for airing in spring 2020.

CECOM Hall of Fame Now C5ISR Hall of Fame

ABERDEEN PROVING GROUND, Md. – To date, four classes, totaling 20 individuals, have been inducted into the CECOM Hall of Fame, which recognizes and memorializes outstanding former members of the CECOM community. That will change for the Class of 2020. For the Class of 2020, the nomination period is now open through January 2, 2020, and has been expanded to become the C5ISR Hall of Fame.

USAISEC Hunts Wildcats; Digs Miners

FORT HUACHUCA, Az. – In a world where bad jokes could be prevalent, the punchline of “Fort Huachuca” could be the satirical ending to a joke asking “define the middle of nowhere.” Jokes aside, one would have to admit Huachuca is “out there” when it comes to remote locations. So how does one ensure an influx of qualified scientists and engineers to support the highly technical and complex mission for the U.S. Army Systems Engineering Command at such a remote location?

Meet The Face Behind the Feathers

ABERDEEN PROVING GROUND, Md. – On a warm summer night in the city of Aberdeen, families gathered for one of America’s favorite pastimes: baseball. The Aberdeen IronBirds, a minor league baseball team, hosted its annual Military Appreciation Night. Families were hurried through the concessions lines, so they could usher their children to their seats. A 4-year-old walked through the crowd holding her mother’s hand, feeling a bit intimidated by all the big people around her.

CECOM Hosts Veterans Day Event

ABERDEEN PROVING GROUND, Md. – The ceremony included a reading of the wartime poem, “In Flanders Fields,” by John McCrae and the playing of the national anthem by guitarist and CECOM video teleconferencing and audio-visual support team lead Russ May.

Test Site Takes Shape

TOBYHANNA ARMY DEPOT, Pa. – The radome being built along Tobyhanna Army Depot’s perimeter road will be used to test AN/TSC-167 Satellite Transportable Terminals, replacing the temporary structures in use now.
