Just over 80% of attempted terrorist attacks in 2017 were successful.

An estimated 75% of insider threats go unreported or undetected, regardless of an organization's size.

Trust your instincts. If it doesn’t look, smell, or sound right, report it!

Since 2016, the average number of incidents increased by the following:

<table>
<thead>
<tr>
<th>Employee or contractor negligence</th>
<th>Criminal &amp; malicious insiders</th>
</tr>
</thead>
<tbody>
<tr>
<td>26%</td>
<td>53%</td>
</tr>
</tbody>
</table>

Between FY06 and FY16, the number of cyber incidents reported by Federal agencies rose from 5,503 to 33,632—a 511% increase!

Just over 80% of attempted terrorist attacks in 2017 were successful.

Your reports to local law enforcement can help stop attacks before they happen.

2018 was the fourth-deadliest year on record for domestic extremist-related killings since 1970.

Guard information about yourself and maintain a low profile.

If you suspect or detect a threat, contact your security officer or call 911.
ANTITERRORISM AWARENESS

THE DO’S & DON’TS

✅ Do trust your instincts and report suspicious behaviors and activities.

✅ Do be vigilant at work and limit discussion and accessibility of any information that may provide insights for terrorists.

✅ Do be aware of your surroundings at community locations: religious facilities, amusement parks, schools, recreation centers, libraries, hospitals, and public transportation.

✅ Do report as many details as you can: date, time, location, description of individuals, vehicle information, and suspicious activities.

✅ Do remember to practice computer security and keep software up to date.

❌ Don’t assume it’s someone else’s job to keep APG and our communities safe from threats.

❌ Don’t wear your DOD CAC and/or campus badge in public.

❌ Don’t post information (even unclassified) about your job or employer on the internet or social media.

❌ Don’t use unsecured internet connections in public places.

❌ Don’t use “check in” location features in social media or apps (disable them).

❌ Don’t let people you don’t know and trust “friend” you on social media sites.

❌ Don’t use the same password for multiple websites.

❌ Don’t hang up if you receive a bomb threat—keep the caller talking, collect information, write a note to a colleague to call authorities, or contact them yourself after the caller hangs up.

If you suspect or detect a threat, contact your security officer or call 911.

TARP TRAINING

APG North (Aberdeen)
August 14, 2019
September 18, 2019
Myer Auditorium
9:00 a.m. | 10:30 a.m.
